**[Brief Description of the Invention]**

**[FIG. 1]** A view illustrating acute myocardial infarction models of Example, showing the state of ischemia-reperfusion, and the mode of administration in 1) a physiological saline treatment group (B group), and 2) an hANP treatment group (A group);

**[FIG. 2]** A view showing a region at risk for myocardial

infarction in each group of the acute myocardial infarction models in FIG. 1; and

[FIG. 3] A view showing the ratio (%) of a region of myocardial infarction to the region at risk for myocardial infarction in each group.
